## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams, US #6,381,887.
3. Williams discloses a box body including side, upper and lower cover faces (Figure 1) forming a receiving space (Figure 4), and an image layer, 18, and "grating" 14 thereon (Figure 5). All of the faces include the grating. Image layer 18 is interlaced, thereby forming an anti-piracy region.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams '887.
6. Williams does not specifically teach using the box for a liquor bottle or including a shock absorption pad, however, this is old and well known in the art. Bottles are commonly packed in boxes. The examiner takes official notice of fragile items

Art Unit: 3611

(including bottles) that are placed in boxes with extra padding underneath, especially for mailing or shipping. It would have been obvious to a person having ordinary skill in the art to utilize such padding in the box of Williams if it is desired to place a bottle or other fragile item therein.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Williams '887 in view of Ungerman, US #4,023,902.

8. Williams does not teach not using the grating where there is a bar code, however, such exceptions for bar codes are well known in the art. Ungerman teaches and encoding system for indicia. The encoding system however is not used over the bar code (column 3 line 16). It would have been obvious to one of ordinary skill to leave a bar code unaltered on the box of Williams so that it may be more easily read.
